

# HTC GREYLINE™ Pre-Separator

## A unique pre-separator

HTC Greyline™ Pre-separator can connect to any dust extractor on the market to add an extra stage of filtration. It also has a bypass valve that directs the dust flow into the dust extractor allowing for continuous grinding.

### Use with following dust extractors:

- HTC GL 35 D
- HTC GL 25 D
- Other dust extractors

#### HTC GL PS Technical Data

Item Number	502158
Approximate Weight (lbs)	123 lbs
Dim. Operating LxWxH	32" x 24" x 67"
Dim. Transport LxWxH	33" x 24" x 52"

# HTC GREYLINE™

HTC Greyline™ is a cost effective line of simple and easy to use floor grinding equipment, diamond tooling and accessories for contractors and DIY.

HTC Greyline™, world leading technology in a powerful and cost effective package! Simplicity added!

## THE BENEFITS

### Clean air

To maintain clean air, all HTC's dust extractors use HEPA 13 air filters. A HEPA 13 filter traps 99.97% of all airborne particles bigger than 0.3 microns and is the most effective filter available.

### Low height

To use as little space as possible during transportation the machine is easy to adjust in height. During transportation the height is only 47 inches.

### Easy to service

The optimized construction provides a machine that is easy to maintain and service, leading to a low maintenance cost.

### Longopac

Longopac makes emptying the dust bag both faster and easier. It is also economical since 100% of the bag material is used.

### Bypass valve = continuous operation

The bypass valve redirects the dust flow into the dust extractor allowing for continuous grinding. This saves money and increases the efficiency of your grinding.

### HTC Greyline™ simplicity

HTC Greyline™ means easy grinding. Just connect the dust extractor with the machine and start grinding.
